Breading

CAUTION: Prior to using appliance for the first time, perform the daily cleaning procedure listed on page 8.

1. Before loading basket for first cooking cycle of the day, dip clamshell basket into hot shortening; allow to drain. This prevents product from sticking to the basket. Hook open clamshell basket to basket hanger on back of cover (see Figure 2).
2. Load washed food product into dip basket; immerse into dip bucket of water (or other wetting liquid). Tilt and rest basket on edge of dip bucket to drain.
3. After excess liquid has drained off product, dump moist pieces into top breading lug. Coat all pieces thoroughly with breading.
4. Remove breaded product from lug and gently shake excess breading from product (Figure 2). Load breaded pieces onto top shelves of basket first. This allows loose breading particles to fall through basket into the lug. Place pieces close together, but do not overlap them.
5. Close loaded basket and use basket hook to lower basket into cooker. Follow your prescribed frying procedures.
