

ATLAS METAL
INDUSTRIES, INC.
FIRST. AND LASTS.

First in quality food serving products because they last

For over fifty years Atlas Metal Industries, Inc. has been a leading manufacturer of quality food serving equipment. Leadership is part of our heritage. Our company's growth, quality, innovation and service are the result of a strong commitment to excellence, of listening to our customers and responding to the needs and challenges of our industry. No other company has the experience and dedication to partner with you in developing systems that fit your unique applications.

The most versatile product line on the market

This catalog illustrates the scope and versatility of our product line. Whether you choose from our BL Series or our wide selection of drop-ins and accessories, you can depend on our large inventory and quick response to satisfy all your equipment and remodeling needs.

In addition our customer service department and field representatives will be happy to provide you with any technical support and information you may need. We're proud of our reputation and our products, and invite you to continue to specify and sell the Atlas line with confidence.

BL Serving Systems

A food service system you can count on

Atlas modular units are the most flexible and versatile in the industry. And no one offers you a wider range of attractive styles, colors, graphics, sneeze guard designs and finishes.

All modular units come standard on casters and are designed to roll in and out of different locations with ease. In a matter of minutes you can change your straight serving line to a scatter system or a food court.

Our quality construction ensures years of reliable service. Combined with our built-in pans and accessories, these units provide an efficient, practical and attractive food service system you can count on.

Mix and match modular unit sizes and plastic laminate colors to create a unique serving system that conforms to your exact size and design requirements. There are virtually no limitations. The end result is a cost-effective, easily modified system that gets the job done.

Designer Series

Modular systems designed around you

Atlas gives you the sophisticated look and features of custom food service equipment, without the custom price tag with our Designer Series Modular Units. They feature quality construction and exclusive Reversa Panel interchangeable designer panels. You can select from a wide range of standard finishes to complement your decor. These full serving systems promise years of cost-efficient, trouble-free service. And no other manufacturer offers 18-gauge stainless steel fabricated liners for all its units. Loaded with exclusive features including adjustable height casters, flip top sneeze guards, and single power cord connection, the Designer Series is a natural for any fine dining environment.

The best modular units for all your serving line needs

Our CW and CA Modular Serving Systems are available in stainless steel or aluminum frame construction. All units include a self-locking device. Simply push the units together, and they will automatically lock. It's the perfect modular unit for your next installation.

Display cases that show you real savings

Atlas saves you a fortune on remodeling and installation costs with these easy to install drop-in refrigerated display cases. These amazing "pass-through" design units will not only keep your food cold and fresh, but will provide maximum visibility for an appealing presentation. They all feature stainless steel construction and self-closing doors.

Drop-ins

Drop-ins that lower costs

Atlas Metal Industries, Inc. is recognized as the market leader and provides the food service industry with the most complete line and sizes of drop-in units. All units include an 18-gauge stainless steel fabricated liner, top frame and vinyl gasket for easy installation. These pans are the strongest, most efficient units on the market. Built to last, they provide many years of trouble-free service.

Self-Leveling Dispensers

For Plates, Trays & Racks

With Atlas Metal's exclusive self-leveling technology and our low maintenance stainless steel construction, you can begin to maximize your food service productivity and convenience, now!

Atlas Metal's Exclusive "Elevator"

These are the finest quality self-leveling systems on the market. All have stainless steel construction on both the springs and housing. The springs come with a lifetime warranty for maximum performance and satisfaction, and are pre-set at the factory so they require no field adjustments. Another advantage is that the dispensers are shipped ready to use.

PD Series Drop-in Dish Dispensers that stand out

These units are self-leveling for high volume dish dispensing for cafeteria and tray make-up areas. And they are available for most standard sized plates, bowls and platters.

PDH-12
Heated shielded dish dispenser

PDS-5
Unheated shielded dish dispenser

PD-5
Open dish dispenser

DIT/DIR Series Drop-ins Tray/Rack Dispensers

These units are also self-leveling for high volume tray/rack dispensing in the cafeteria and tray make-up area. They are available for most standard sizes.

Partnerships

We partner with many of the leading manufacturers of food guards, ceramic cook tops, solid surface suppliers and display canopies, in order to provide you with maximum design flexibility for your next project or installations.

A brilliant choice of colors that complement any décor

Atlas gives you a wide range of attractive standard plastic laminate colors to choose from as well as urethane painted panels, which blend with any décor. You can also add your school logo or mascot on the counter fronts, and promote your school spirit! Custom colors are available upon request.
