Description:

Self-contained refrigerator storage unit with mechanically cooled raised rail. These units are offered in a variety of lengths to meet your specific base storage or pan storage requirements. The mechanically cooled pan opening uses Randell's exclusive design technologies, such as our Exclusive Refrigerated Raised Rail Thermostat, allowing customers to make adjustments to the rail temperatures (independent of the base). Automatic hot gas evaporator is provided for eliminating the base coil's condensation. The rail is designed to be a manual defrost system and allows the operator to shut the rail off while leaving the base operational.

Specifications:

CABINET EXTERIOR: Top to be one piece of die-formed 16 gauge stainless steel with 2 1/2" nosing. Ends at top fitted with recessed heavy duty steel bars for field bolting units together, producing a hairline seam. Hinged louver panel to be stainless steel. Exterior body to be corrosion resistant steel. Door opening frames are ABS and contain magnetic strip for positive seal of door gaskets. Work surface to be at 36" work height. Legs to be 6" high stainless steel with adjustable bullet foot. Legs mounted to full length channel frame assembly which is integrally welded to bottom of body assembly. Legs can be moved left to right to avoid floor obstacles during installation.

CABINET INTERIOR: Base interior to be ABS thermoplastic at ends only. Stainless steel interior liner to be coved cornered to form bottom, back and top. One baked enamel finished shelf provided behind each door. Unit insulation to be CFC free foamed in place urethane.

DOORS: Door fronts to be 22-gauge stainless steel exterior front with 16 gauge stainless steel door pulls/handles. The interior liner is vacuumed formed ABS with integral gasket retainer for easy cleaning and accepts Randell's Exclusive Press Fit Gasket system. Doors are mounted on concealed hinges. One removable wire shelf is supplied behind each door.

REFRIGERATION: System is a balanced heavy duty R-404A refrigerant system with an energy efficient automatic defrost (for base evaporator coil). The base is cooled by an independent blower coil operating on its own expansion valve and thermostat and operates through a dedicated solenoid valve. The rail is provided with a pressure control to operate the condensing unit on demand; and a rail thermostat (located in the compressor housing) making it easily adjustable for specific ambient conditions without effecting the balance of the system. An on/off switch for the rail is located behind the hinged louver panel.

Standard Features:

- Low profile 2" recess pan design provides easy reach and optimal pan temperatures & reliability
- Balanced high capacity refrigeration system with expansion valve metering-able to handle peak period demands
- · Front breathing compressor housing with directed air flow
- Easy maintenance press-fit gaskets
- · Raised rail thermostat
- · Drain in rail for easy cleaning
- · Hinged louver for easy access
- 6" high legs—adjustable and movable
- Foamed in place "CFC free" urethane insulation
- Hinged removable stainless steel covers
- · Automatic base defrost with condensate evaporator
- Available up to 16' under one common assembly
- Adapter bars standard to accommodate a compliment of 1/6 size pans
- Front breathing louver design allows sealing to wall & curb mounting without special requirements

Options & Accessories:

Patented Drawer Cartridge Systems - Exclusive
Randell Feature + 3 years parts & labor warranty!
Partial length rails
Flat-top rails (non-angled) for use in display type kitchens
Ambient fighting hood design with slide back cover
Hinged slide back removable cover
Lift-off (removable) night covers
Tray racks for sheet pans (33" dp., 24" doors only)
Cutting boards
Stainless Steel Ends
Stainless Steel Back
Laminate fronts, ends and back options
Casters in lieu of legs
Export voltages
Over-shelving storage options
Compressor on right option
Wide pan rail

NOTE:

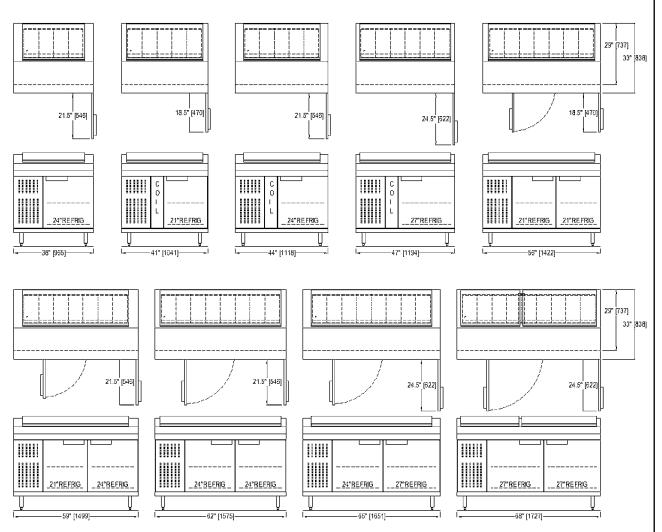

Pan capacity reflected is the actual amount of pans that are clearly accessible by the operator. Units with multiple covers may actually have additional pan capacity that is partially obstructed by the cover divider/mullion.

BTU load and capacity ratings based on 86F ambient.

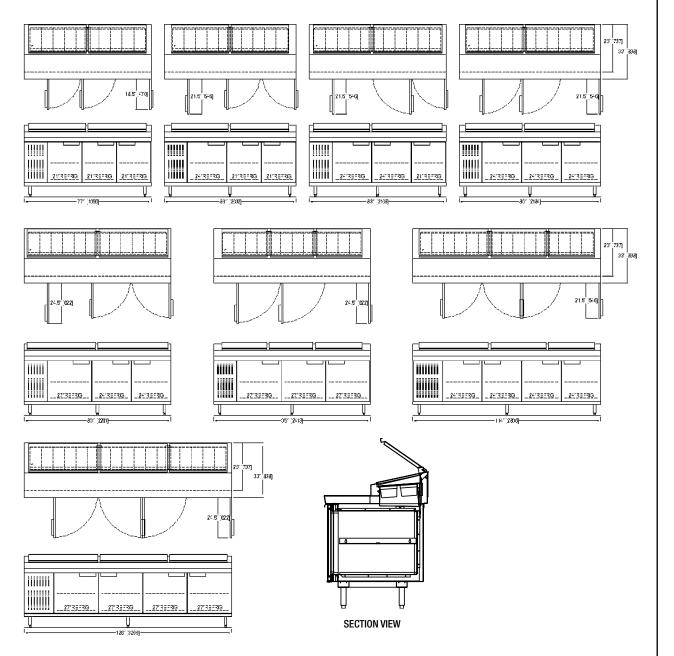

DOOR OPENING SIZES - INTERIOR DEPTHS

Door Width	Clearance Lt. to Rt.	s Through Door Top to Bottom	Interior Depth Behind Door (unit depths in parentheses)
