Superior Performance With Exceptional Recovery For High Volume Electric Frying.

High efficiency 14KW ribbon-type immersion heaters provide efficient energy transfer for fast frying and quick recovery to increase cooking output of the fryer. Low watt density design prolongs the life of the elements and prevents scorching the shortening. Heaters swing up out of the way for ease of cleaning and access to the large cold zone.

STANDARD FEATURES

- Stainless steel frypot has a **lifetime warranty**.
- Stainless steel front panel, trim and door.
- Sealed construction immersion type 14KW heating elements made of a high temperature alloy with a stainless steel sheath.
- Heating elements lift up out of the way for easy cleaning of the frypot.
- Redundant contactors and hi-limit control for increased safety.
- Power, heating, and hi-limit lockout indicator lights are mounted conveniently on the front panel.
- Lexan faced control panel is recessed to protect controls from damage.
- Built-in circuit breaker and fuse holder mounted inside front door for easy access.
- Front 1-1/4" full port drain valve for easy no clog cleaning.
- Available with 2 heavy duty automatic basket lifts (14EL-14AA)
- Solid state thermostat for precise temperature control
