SPECIFICATIONS:

TOP: Top constructed of 16 gauge, type 304 stainless steel, die-formed, welded, buffed and polished to a uniform finish. **OMNI and GALAXY:** The Atlas Edge runs the full length of the top and consists of a double 45 degree angle with a polished finish.

BODY: End mullions are die-formed, 18 gauge paint grip steel, all welded box beam construction. Interior sides are enclosed with 20 gauge paint grip steel panels attached to the end mullions. End mullions are joined at the top, front and rear by an apron running the full-length of the unit; apron is 6-1/2" on the front and 8" on the rear. Corner sections are formed with 45 degree angles on the front for the designer look. End mullions are joined at the bottom with a full length angle iron frame, supporting a removable stainless steel bottom shelf. Steel surfaces are finished with Permakote urethane based paint.

FRONT AND SIDES: Constructed of rigidized honeycomb material with plyshield plywood stringers. Panel is framed with 5/8" x 1" polyethylene and a plastic laminate front. Rear is finished with a backing sheet to insure watertight integrity. **OMNI:** 45 degree designer corners are painted bright gray with a urethane based paint. Solid color mica panels in operator's choice. **GALAXY:** 45 degree designer corners are painted bright red with a urethane based paint. Atlas' unique "grid pattern" is permanently screened and laminated in the mica. **OAKWOOD:** 45 degree designer corners are mirror finish brass-look. Light oak-look mica panels complete the appearance package. **VISCAYA:** 45 degree designer corners are mirror finish brass-look. Rich mahogany-look mica front panels feature stained and sealed hardwood trim.

ADJUSTABLE CASTERS: N.S.F. listed, 5" diameter, non-marking neoprene rubber tired swivel casters. Two casters have foot operated locking brakes. All Designer Series units feature Atlas' exclusive adjustable height, leveling casters.

LOCKING DEVICES: When two or more units are ordered. Precision's unique Cam-lock locking system includes an exclusive interlocking stain-

less lock under the top counter on the customer's side and a positive action Cam-lock on the operator's side.

ACCESSORIES:

- Tray slide**, 12" wide, solid, ribbed, fold-down. OMNI & GALAXY: all stainless steel with highlighted edge; OAKWOOD & VISCAYA: all stainless steel.
- Work shelf**, 8" wide, stainless steel, flat, fold-down.
- Double deck display case**, with Laminated Glass and sneeze guards. OMNI & GALAXY: stainless steel frame and chrome plated brackets; OAKWOOD & VISCAYA: millwork frame with brass plated brackets.
- Laminated glass and sneeze guards** for display case (set of four).
 - Fluorescent light** under display shelves or canopy.
- High shelf**, with glass sneeze guard. OMNI & GALAXY: stainless steel shelf with highlighted edge and chrome plated brackets; OAKWOOD & VISCAYA: stainless steel shelf and brass plated brackets.
 - Laminated glass end sneeze guards** for high shelf (set of two).
- Buffet canopy**, features Atlas' unique flip-top sneeze guard on customer's side only - SAR Plexiglas. Canopy body is of millwork construction with plastic laminate finish. OMNI & GALAXY: stainless steel top with highlighted edge and chrome plated brackets; OAKWOOD & VISCAYA: stainless steel top and brass plated brackets.
- Curved Plexiglas sneeze guard.**
- Stainless steel middle shelf.**
 - Sliding doors** (or hinged, DSUT-3230 only)
- Urn drain**, 4-1/2"W x 2"D, stainless steel with removable splash-proof grill and 1" IPS

drain. Specify length.

- Tool drawer**, stainless steel, 20"L x 20W x 5"D.
 - Convenience outlet**, panel mounted, with 6 foot cord and plug (specify wattage, voltage and location).
 - Dish dispenser**, self-leveling, non-heated installed (specify diameter and location).
 - Tray/rack dispenser**, self-leveling, installed with stainless steel enclosure (specify size and location).
- Cutouts** only for pans, tray/rack/dish dispenser
 - Rear enclosure**, paint grip steel, color of base frame.
 - Stainless steel legs** with adjustable feet, in lieu of casters.
 - Reversa-Panel** an alternate plastic laminate is substituted for backing sheet on the rear. The panel may then be reversed in the field, without the use of tools, to create an alternate look.

Specifications subject to change without notice.
