Remote Waste Pulping System

Description

Standard SOMAT® Model HE-9S Hydra-Extractor® with 5 HP drive motor, 7-1/2 HP or 10 HP return pump, chemical additive pump, automatic rinse system, valve package, Som-A-Trol control panel and discharge chute with limit switch.

Benefits

- As much as 8 to 1 (87.5%) volume reduction
- Reduced labor cost
- Better sanitation
- Water conservation
- Improved operator morale
- Reduced silverware loss
- Processes a wide variety of waste

Operation: Slurry, consisting of 5% solids and 95% water, is automatically transported through a pipeline after being processed in the pulper(s) to the Hydra-Extractor, where water is removed and the resultant semi-dry pulp is discharged into a haul-away container. The extracted water is recovered and returned to the pulper(s) for reuse. The capacity of the Hydra-Extractor determines how many pulpers can be designed to operate with it concurrently..

Somat equipment provides an economic and efficient answer to cutting the high and ever increasing costs associated with waste handling. Manufactured by Somat Company of Lancaster, Pennsylvania, originators of waste pulping systems and specialists in waste reduction technology.

Technical Specifications

Hydra-Extractor: Rigid stainless steel weldment with stainless steel stand, head assembly with 5 HP belt driven motor matched to a 25:1 gear reducer, 28" long stainless steel discharge chute with limit switch, chemical additive pump, automatic rinse system. Water extractor mechanism consists of 9" diameter stainless steel screw with nylon brush edge, stainless steel adjustable gate and matching 9" diameter reinforced stainless steel screen.

Valve Package: All valves required for proper operation (automatic rinse system).

Som-A-Trol® (Electrical Control Panel): UL approved. Includes all necessary electrical components prewired to a terminal strip in a NEMA 4 stainless steel enclosure.

Options Available:

- Extended discharge chute (Shown)
- Hinged chute
- Extended stand
- Pulp level detector
- Special electrical characteristics

Special Requirements:

- 10 HP or larger return pump. Determined by piping conditions.
- Water economizing tank. Required when 10 HP or larger return pump is used.
- Pulp Screw Conveyor and controls. Required to convey pulp from discharge chute to haul-away container when location of container does not permit gravity discharge.

Electrical Characteristics: 208/230/460 volt, 3 Phase, 60 Hertz

Capacity: 3,000 pounds per hour of foodservice waste mix, consisting of food scraps, plastics, milk cartons, paper, aluminum foil and cardboard.

Finish: All exterior surfaces, except where polished stainless steel, are prime coated and finished with two coats of enamel paint.

Equipment only is supplied by SOMAT Company; installation, piping and wiring not included.
