INTRODUCTION

This server is intended for use with a BUNN® DUAL® TF DBC®, SINGLE® TF DBC® or ICB family brewers. When proper precautions are followed, 1.0 up to 1.5 gallons of coffee may be brewed directly into the server and then transported to a remote serving location. The server must be placed on a sturdy counter or shelf.

NOTE: Calibration of the brewer is required prior to the use of the Digital TF Server.

USER NOTICES

The notices on this server should be kept in good condition. Replace unreadable or damaged labels.

DAILY CLEANING

CAUTION: CLEAN AND SANITIZE YOUR SERVER **DAILY**

NOTE: Bunn-O-Matic recommends the 3 step method for cleaning and sanitizing the server. The 3 step method consists of hot soapy water using an approved detergent, a fresh water rinse, and an aqueous sanitizing solution using an approved **non-chlorine** sanitizer. **Do not submerge server.**

1. Run a complete brew cycle *of just hot water* into the server and let it set for a minute. Empty the server completely by opening the faucet.
2. Remove the sensor assembly, fill server with cleaning solution and thoroughly clean the inside of server.
3. Rinse server thoroughly using fresh water rinse.
4. Fill server with sanitizing solution and let the server set for 5 minutes, then drain through fully open faucet. Thoroughly rinse server after sanitizing.
5. Remove the faucet handle/stem assembly by unscrewing the faucet nut just beneath the faucet handle.
6. Use enclosed cleaning brush to thoroughly clean the faucet body and tube.
7. Disassemble the faucet/stem assembly. Thoroughly wash all faucet parts in a mild detergent and water solution. Rinse the parts in hot water. Sanitize the parts for five minutes, thoroughly rinse, then air dry completely.
8. Use enclosed cleaning brush to thoroughly clean the fill tube of the sensor assembly.

NOTE: Never submerge the Digital ThermoFresh® Server Display or sensor assembly in water.

9. Wipe sensor assembly with a clean, damp cloth.
10. Reassemble the faucet and attach it to the dispenser.
11. Wash the entire outside surface of the server and display with a clean damp cloth.

PERIODIC CLEANING

1. Remove the sensor assembly from the server.
2. Remove the two thumb screws and slide display assembly from the server.
3. Wipe the surface of the display unit, area under the display unit, and sensor assembly with a clean damp cloth.
4. Wash the entire outside surface of the sensor assembly with a mild detergent and water solution and rinse with hot water. **Do not submerge.** **NOTE:** Thoroughly cleaning the sensor assembly fins will prevent inaccurate level readings.
5. Replace the display unit and sensor assembly.

SERVER WITH STAND

REPLACEMENT PARTS

1. 42554.1001 Display Kit, Countup (Includes items 2 - 4)
2. 42826.1000 Screw, Thumb #6-32 x .25"
3. 37224.0000 Batteries, 4 Pack AAA
4. 42546.0001 Gasket, Battery Cover
5. 42547.0001 Cover, Battery
6. 02361.0000 Screw, Pan Head #4-40 x .25"
7. 43135.0000 Handle, Faucet
8. 35003.0000 Nut, Faucet Spout
9. 00601.1001 Faucet Spring (Package of 6)
10. 29164.1000 Faucet Stem (Package of 6)
11. 00600.1000 Faucet Seat Cup (Package of 6)
12. 42567.0000 Faucet Body
13. 42543.0000 Guard, Faucet
14. 35074.1000 Screw, Pan Head M4 x .7 x .25
15. 43231.0000 Washer, M4 x 9MM
16. 42584.1000 Plug, Front (Package of 10)
17. 42818.1001 Sensor Assy, 1.0 Gal (Includes items 14 & 15)
18. 42565.1000 Sensor Assy, 1.5 Gal (Includes items 14 & 15)
19. 42563.1002 Cap, Sensor Assy (Package of 5)
20. 39043.0000 Decal, Do Not Submerge
21. 42562.0000* Handle, Server
22. 42758.0000* Shoulder Screw
23. 42585.1000 Plug, Rear (Package of 10)
24. 43246.1000 Cover Assy, Top
25. 42761.0000* Screw, Pan Head M4 x 9
26. 35710.0000 Decal, Warning Hot Liquid
27. 32591.1000 Tube, Silicone .50" ID x 12.0" LG (cut to length)
28. 28526.1000 Tube, Silicone .31" ID x 12.0" LG (cut to length)
29. 42912.0000 Foot, Rubber
30. 43163.0000 Screw, Pan Head #8 x .75"
31. 42295.0001 Elbow, 90°
32. 42890.1000 Base Cover
33. 35016.0001 Insert, Stand
34. 38929.0002 Stand, Server
35. 39617.0000 Screw, Pan Hd Plastite #6 x .75"
36. 38930.0002 Base Plate, Stand
37. 44010.0000 Screw, Pan Head #8 x .50"
38. 39443.1003 Pad, Adhesive Back .75" Dia.
39. 38931.1002 Kit, Drip Tray (Includes item 31)
40. 38932.0000 Cover, Drip Tray
41. 45457.0000* Decal, Do not Submerge
42. 39043.0002* Decal, Do not Submerge Server
43. 39043.0001* Decal, Do not Spray
44. 35071.0000 Decal, Black Wrap 1.5 Gal. (Not Illustrated)
45. 37974.0000 Decal, Black Wrap 1.0 Gal. (Not Illustrated)

- 9. 38931.1002 Drip Tray Kit (Includes item 7)

DIGITAL DISPLAY

The Digital ThermoFresh® Server is equipped with a digital probe and display called a Digital Sight Gauge. The probe contains a circuit board designed to sense liquid levels & hold times. During the monitoring process, the probe sends information to the display. The display then allows the user to monitor the liquid level and freshness (hold time) of the beverage held in the server.

HORIZONTAL BAR

Using the Digital Sight Gauge display, the liquid level in the server can be monitored by watching the horizontal bars. The 1.0 gallon display is equipped with 4 bars and the 1.5 gallon with 6 bars to represent the level inside the dispenser. (each bar represents a quart, or one quarter of a gallon)

All four/six bars will be displayed when the server is full. When the level of the liquid drops to a certain level, the highest bar on the display will no longer be illuminated. These bars will continue to disappear as the level inside the dispenser drops. (See Fig. 1)

FIG. 1

COUNT UP TIMER

The Digital display is set to count up to 4:00 hours. The display counts up in one minute increments, flashing at 2:00 hours and continuing to flash once it reaches 4:00 hours. (See Fig. 1)

TIMER RESET

The display will reset to 0 when any of the following occurs:

- The liquid level in the server is increased by 1 bar for a sustained period of time. (brewing into, or adding additional liquid to existing beverage)
- A fresh new beverage is brewed into the server.
- When the contact pins of the sensor assembly are disengaged from the display for more than 20 seconds.

DISPLAY OFF

When the sensor assembly on the server is removed or loosened for more than 20 seconds, the display on the Digital Sight Gauge breaks contact with the pins on the surface of the server. When this happens, the outline that surrounds the Horizontal Level Bars will flash on and off and the time disappears. This indicates that the display has been disengaged from the probe and cannot receive data.

When the display is in place and engaged, but the server is empty, the outline surrounding the Horizontal Level Bars will be on but not flashing and the Freshness Time will not be displayed. All other portions of the display will not be visible. This indicates the display is engaged and ready to receive data from the probe, but the server is empty.

The only time the display will be completely blank, is when the batteries have been removed or have expired. (See the “Battery Replacement” section for additional information.)

FRESHNESS TIME

This unit is factory set to count up to 2:00 hours, and begin flashing. If a reset condition has not occurred, it will continue to flash and count up to a maximum of 4:00 hours. Flashing notification is adjustable and can be set between 15 minutes and 3 hours 45 minutes in 15 minute increments. Setting changed by opening battery compartment and positioning rotary switch using a small screwdriver. Settings are defined in the Flashing Notification Table.

LOW BATTERY INDICATOR

When the batteries in the display unit are running low, the display is also equipped with a battery icon. The upper most bar used in monitoring liquid levels, will begin to flash in the shape of a battery to indicate that it is time to replace the batteries. (See FIG. 1)

BATTERY REPLACEMENT

The Digital Sight Gauge display comes equipped with 4 AAA batteries. The batteries have a use life of approximately 1 1/2 years under normal operating conditions.

NOTE: Batteries are not covered under product warranty.

To replace the batteries:

1. Remove the sensor assembly from the server.
2. Remove the two thumb screws and slide display assembly from the server.
3. Loosen the two screws on the bottom of the display, Fig 2 and rotate the cover approximately 180°.
4. Replace used batteries with 4 AAA alkaline batteries.

FIG. 2

SENSOR ASSEMBLY INSTALLATION

Proper installation of the sensor assembly is achieved by aligning the contacts of the sensor assembly (B) with the contacts on the back of the sight gauge (A) when the sever handle is in the fully open position. Once the sensor assembly is engaged into the server, it is locked in place by flipping the handle over approximately 180° as shown in Fig 3.

FIG. 3

BUNN-O-MATIC COMMERCIAL PRODUCT WARRANTY

Bunn-O-Matic Corp. ("BUNN") warrants equipment manufactured by it as follows:

- 1) All equipment other than as specified below: 2 years parts and 1 year labor.
- 2) Electronic circuit and/or control boards: parts and labor for 3 years.
- 3) Compressors on refrigeration equipment: 5 years parts and 1 year labor.
- 4) Grinding burrs on coffee grinding equipment to grind coffee to meet original factory screen sieve analysis: parts and labor for 3 years or 30,000 pounds of coffee, whichever comes first.

These warranty periods run from the date of installation BUNN warrants that the equipment manufactured by it will be commercially free of defects in material and workmanship existing at the time of manufacture and appearing within the applicable warranty period. This warranty does not apply to any equipment, component or part that was not manufactured by BUNN or that, in BUNN's judgment, has been affected by misuse, neglect, alteration, improper installation or operation, improper maintenance or repair, damage or casualty. This warranty is conditioned on the Buyer 1) giving BUNN prompt notice of any claim to be made under this warranty by telephone at (217) 529-6601 or by writing to Post Office Box 3227, Springfield, Illinois 62708-3227; 2) if requested by BUNN, shipping the defective equipment prepaid to an authorized BUNN service location; and 3) receiving prior authorization from BUNN that the defective equipment is under warranty.

THE FOREGOING WARRANTY IS EXCLUSIVE AND IS IN LIEU OF ANY OTHER WARRANTY, WRITTEN OR ORAL, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OF EITHER MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. The agents, dealers or employees of BUNN are not authorized to make modifications to this warranty or to make additional warranties that are binding on BUNN. Accordingly, statements by such individuals, whether oral or written, do not constitute warranties and should not be relied upon.

If BUNN determines in its sole discretion that the equipment does not conform to the warranty, BUNN, at its exclusive option while the equipment is under warranty, shall either 1) provide at no charge replacement parts and/or labor (during the applicable parts and labor warranty periods specified above) to repair the defective components, provided that this repair is done by a BUNN Authorized Service Representative; or 2) shall replace the equipment or refund the purchase price for the equipment.

THE BUYER'S REMEDY AGAINST BUNN FOR THE BREACH OF ANY OBLIGATION ARISING OUT OF THE SALE OF THIS EQUIPMENT, WHETHER DERIVED FROM WARRANTY OR OTHERWISE, SHALL BE LIMITED, AT BUNN'S SOLE OPTION AS SPECIFIED HEREIN, TO REPAIR, REPLACEMENT OR REFUND.

In no event shall BUNN be liable for any other damage or loss, including, but not limited to, lost profits, lost sales, loss of use of equipment, claims of Buyer's customers, cost of capital, cost of down time, cost of substitute equipment, facilities or services, or any other special, incidental or consequential damages.
