## BUNN ®

## AXIOM BREWING & CLEANING INSTRUCTIONS

## BREWING

Insert a BUNN<sup>®</sup> filter into the 2. 1. funnel.

Pour in fresh coffee.

BUNN

3. Shake funnel gently to level 4. grounds.

BUNN

Slide funnel into the funnel rails of the brewer.

5. Place an empty decanter under 6. the funnel.

## CLEANING

1. Clean and sanitize the funnel. NOTE: Do NOT clean this equipment with a water jet device.

(indicator glowing).

Press the "ON/OFF" switch 7.

2. Use a clean damp cloth rinsed 3. in mild, non-abrasive detergent to clean the sprayhead panel.

Momentarily press and release

the "BREW" switch.

8.

Remove the sprayhead.

When brewing is complete,

discard the grounds and filter.

Use the pointed end of spray-4. head cleaning tool to remove any mineral deposits from the sprayhead openings. The sprayhead openings must always remain open.

NOTE: Any buildup on the sprayhead and fitting may restrict water flow, and impact your coffee brewing. For consistently great coffee, clean sprayheads and fittings weekly with sprayhead cleaning tool (#38227.0000). Upon visual inspection it may appear that light passes through all openings in the sprayhead, but a 5. thin film of residue can pass light and still impede water flow.

Use the blunt end of sprayhead cleaning tool to clean the sprayhead outlet fitting.

6. Re-install the sprayhead.
