Show 'N' Sell self-contained refrigerated display cases

Short form specifications

Exterior top and ends shall be finished with 22-gauge stainless steel. Exterior front shall be finished with stainless steel and plastic laminate trim. Interior ends shall be ABS plastic. Interior bottom shall be 22-gauge stainless steel. Cabinet shall be insulated with foamed-in-place polyurethane.

Interior shall have (2) 15" (38.1 cm) deep removable epoxy-coated wire shelves. Cabinet shall have (2) 36" (91.4 cm) long fluorescent light fixtures.

Refrigeration system shall use HFC-404A refrigerant, and maintain 36°F (2°C) to 40°F (4°C) interior cabinet temperature at 100°F (38°C) ambient room temperature.

Electrical connections shall be 115 volt, 60 Hertz, single phase. Unit shall be wired with a 3-wire, grounded, maximum 8' (2.4 m) cord and plug.

The following applies to 7000-M (single service mirror-back) models only:

(2) 0.5" (1.3 cm) thick, bottom-mounted thermopane glass doors shall be provided in the front of the equipment. Doors shall be sliding, self-closing and removable for cleaning. Exterior back shall be 22-gauge aluminum. Interior back of cabinet shall have a 0.25" (0.6 cm) thick mirror mounted vertically.

The following applies to 7000-S (single service see-through) models only:

(2) 0.5" (1.3 cm) thick, bottom-mounted thermopane glass doors shall be provided in the front of the equipemnt. Doors shall be sliding, self-closing and removable for cleaning. Exterior back to be finished with stainless steel and plastic laminate trim. Interior back of cabinet shall have a 0.5" (1.3 cm) thick thermopane glass panel.

The following applies to 7000-P (double service pass-through) models only:

(4) 0.5" (1.3 cm) thick, bottom-mounted thermopane glass doors shall be provided, (2) each in the front and back of the equipment. Doors shall be sliding, self-closing and removable for cleaning.

Optional accessories & modifications

*220 volt, 50 Hertz electrical system

Wall-mounting kit

Sliding door lock

(4) 6" (15.2 cm) high stainless steel legs

Extra epoxy-coated wire shelf

*Inclusion of this option will alter the electrical specifications of the unit.

INSTALLATION NOTES:

Equipment must be installed in a level area away from any source of intense heat, including ranges and ovens. Proper air flow must be provided to the machine compartment. Do not install this equipment in a location which closes off both the side and rear ventilation of the machine compartment. Either the side or front ventilation must be left open with a minimum clearance of 6" (15.2 cm).
