Specification Line®: Glass Door Single Section Dual Temp Refrigerator/Freezer Reach-Ins

## Models

SSDTR1-GH	Refrigerator top/freezer bottom stainless exterior and interior glass half door
SSDBR1-GH	Freezer top/refrigerator bottom stainless exterior and interior glass half door
SADTR1-GH	Refrigerator top/freezer bottom stainless exterior and aluminum interior glass half door
SADBR1-GH	Freezer top/refrigerator bottom stainless exterior and aluminum interior glass half door
SMDTR1-GH	Refrigerator top/freezer bottom stainless front aluminum exterior and interior glass half door
SMDBR1-GH	Freezer top/refrigerator bottom stainless front aluminum exterior and interior glass half door

SSDBR1-GH

## Standard Features

- Stainless steel interior and exterior (SS)
- Stainless steel exterior, aluminum interior (SA)
- Aluminum interior and exterior, stainless front (SM)
- Door locks with heavy duty strikes
- Two exterior digital thermometers with high/low temperature alarm
- Easy to use electronic control
- Easy access "flip up" shroud
- Four wire shelves - SA/SS standard with chrome plated shelves and SM standard with epoxy coated shelves
- 10' attached cord and plug
- 6" adjustable stainless steel legs
- Stainless steel breaker strips
- High density foamed in place environmentally friendly, Kyoto Protocol Compliant, Non ODP (Ozone Depletion Potential), Non GWP (Global Warming Potential) polyurethane keeps energy costs low
- Two year parts & labor warranty
- Five year compressor warranty

## Options & Accessories

- Security (prison) package
- 6" polyurethane casters
- Incandescent light
- Door field rehingability
- Additional shelves
- Tray slides
- Stainless steel back
- Laminate on front, sides and back
- Bottom mount electrical
- Stainless steel banking strip
- Heat shield end
- Stainless steel kick plate
- Laminate kick plate
- 4" stainless steel utility base
- 230-50-1 electrical
- 220-60-1 electrical

## Specifications

**Exterior:** SS and SA models shall have corrosion resistant stainless steel exterior cabinet sides, front and shroud. SM models shall have corrosion resistant aluminum on exterior cabinet sides and will have stainless front and shroud. All units shall have the upper shroud hinged with a gas assist stay open feature to provide easy access to the refrigeration system.

**Interior:** Cabinet interior shall be corrosion resistant stainless steel (SS models) or heavy gauge aluminum (SA and SM models). Bottom and top surfaces shall be die stamped to provide radius corners and recessed floor. Four wire shelves are provided, SA/SS standard shelves are chrome plated, SM standard shelves are epoxy coated. Shelves rest on clips which are adjustable on 1" increments on stainless steel pilasters affixed to the cabinet interior. Pilasters are removable without tools for cleaning. Mounted to the interior ceiling of each compartment, the interior fluorescent lights are controlled automatically through a switch mounted in the hinge assembly to protect against breakage. Door openings are protected with high impact ABS breaker strips. An evaporator shall be mounted to the ceiling assuring low velocity, even air movement throughout the cabinet interior.

**Doors:** Double paned tempered thermopane glass. Constructed with a combination of extruded aluminum and PVC. Each door has two edgемount, self-closing, cam lift style hinges. Doors can be removed from the cabinet without the use of tools. Door handle is continuous

along vertical dimension of the door. Door gaskets are magnetic and mount to the door, snapping in place and removable with out tools. Keyed door lock is mounted to the door. Lock engages into a heavy duty strike mounted to the cabinet face.

**Refrigeration system:** Each compartment has its own separate refrigeration system. Condensing units are located on top of the cabinet, outside the food zone, behind the upper shroud. Evaporator coils are located inside the cabinet mounted to the interior ceiling of each compartment. Defrost is automatic. Condensate travels down a tube in the cabinet side wall to a receptacle mounted to the exterior bottom of the cabinet where it is evaporated with the aid of an electric heater. Each compartment's temperature is individually monitored, controlled and displayed on the exterior of the cabinet. Refrigerator compartment maintains between 33°F and 41°F. Freezer compartment maintains temperature between 0°F and -5°F.

**Electrical:** Unit comes with one 10' cord and plug with single point connection to all cabinet and refrigeration system electronics. It is attached to a junction box mounted on the exterior top of the cabinet.
