Congratulations!

Your selection of the Doughpro DP3300 is a sound business decision. Doughpro equipment is a result of the highest quality engineering and time-tested design. Your machine combined with Doughpro's reputation of innovation in dough pressing equipment manufacturing, insures the continuing capability of delivering the best-decorated product possible.

This manual describes installation, operation, and maintenance procedures for your new model DP3300.

Your model DP3300 machine will have a long trouble-free life. Read this manual carefully and keep it with your machine; it's your key to proper operation and lasting service.

Installation

DOMESTIC

Use a separate 15 amp AC circuit. Only industrial extension cords with proper wire size should be used; size 16/3 wire for distance up to 25 feet, and size 14/3 for distance up to 50 feet.

INTERNATIONAL

Use a designated 16 amp AC circuit. Only industrial extension cords with proper wire size (2.5 sq. mm) shall be used.

Make sure there is a proper electrical wall outlet located within reach of the cord and plug attached to the press. Then place the press in an area which allows for "swing clearance" of the lower platen plus vertical and horizontal clearance of the press itself.

Limited Machine Warranty

Doughpro warrants this dough press machine, when operated under normal conditions, to be free from manufacturing defects in material and workmanship for a period of one year on parts and labor from the invoice date.

This warranty will be effective only when Doughpro authorizes the original purchaser to return the product to the factory in South Gate, California freight prepaid and only when the product, upon examination, has proven to be defective.

This warranty does not apply to any machine that has been subjected to misuse, negligence or accident.

Doughpro shall not be liable for the injury, loss or damage, direct or consequential, arising out of the use or the inability to use the product.

No claim of any kind shall be greater in amount than the sale price of the product or part to which claim is made.

This is the sole warranty given by the company, it is in lieu of any other warranties, expressed or implied, in law or in fact, including the warranties of merchantability and fitness for a particular use, and is accepted such by the purchaser in taking delivery of this product.

Specifications

Electrical:

120V/60Hz/1450W/12.5Amps/AC

Also available; specify when ordering:

240V/50-60Hz/1450W/6.04Amps

Includes 68" cord and NEMA approved plug.

Shipping Weight:

200lbs. (91kg)

General Specifications

1. **Piston Activation Buttons (2)**
2. **On/Off Power Switch**
3. **Digital Temperature & Time Control** – 0-200°F Temperature Setting.
4. **Upper Platen** – Heated to help the dough flow faster and more evenly.
5. **Disengage Switch** – Releases upper platen in case of emergency.
6. **Thickness Control Dial** – Controls the thickness of the dough, (varies depending on size of dough ball).
7. **Lower Platen** – Dough is placed here; swings out for easy removal of flattened dough.
8. **Grease Port** – Using a standard grease gun, squeeze a food approved, high temperature grease into the port (*once monthly*).

Exterior Finish: Highly resistant white, high gloss powder coat, approved for use with food products. Molds are probrite coated anti-stick surfaces.

Safety Summary

WARNING

In case of power cord damage, do not attempt to repair or replace the power cord. Contact the manufacturer or the local distributor.

WARNING

Avoid touching hot surfaces while operating the machine.

CAUTION

During normal operation, the base of the machine must be installed or placed above the wall socket.

CAUTION

When servicing or cleaning the machine, make sure that the power cord is removed from the wall socket.

Operation Timer/Temperature Control

Solid State Controller

This controller has three (3) control features:

1. Temperature – Temperature may be set from 100°-325°F (38°-163°C)
2. Time – Time may be set from 1 second to 10 minutes.

3. Counter – Cycle counter counts the number of applications from 1 to 9999 (see additional Notes – Counter).

Controller Operation

1. If the temperature is not being displayed, press the **MODE** button until temperature is displayed.
2. Push and hold **SET** button and simultaneously push UP (▲) or DOWN (▼) arrow buttons to the desired temperature setting.
3. Press the **MODE** button until time is displayed.
4. Push and hold **SET** button and simultaneously push UP (▲) or DOWN (▼) arrow button to the desired timer setting.

Dough Pressing Operations

SETTING CRUST THICKNESS CONTROL:

Setting crust thickness is as simple as the twist of a dial. By means of trial and error, rotate the dial until desired thickness is obtained. **Note: Never force the dial past its stop position or damage could occur.**

PRESSING DOUGH:

First allow the upper platen to reach programmed temperature. In most cases, 150°F (65.5°C) is ideal, but trial and error testing will determine the best temperature for your dough.

For best results, your dough should be proofed before pressing, but it will also press directly out of your refrigerator.

Flour is not required to press a crust and should not be dusted on any part of the machine.

Determining the proper timer setting also requires some trial and error until you obtain the correction thickness and diameter of your product. Start with five (5) seconds and go up or down from there. **Remember that the timer does not actuate until the upper platen mates with the lower platen and resistance is felt.**

1. Apply a quick spray of a good water based food release on the lower platen. Doughpro offers its own food release spray NATURALLY CLEAR Model No. DPPC1. (See our catalog and price list for information.) Note: This spray will not affect the taste of your crust in any way.
2. Place your pre-portioned ball of dough in the approximate center of the lower platen. Add another dash of spray to the top of the dough ball.
3. Close the platen and, with both hands, press the two green buttons on the face of the press.

4. Hold the buttons in until resistance is felt then release at once. The timer will actuate and when the time cycle is completed, the upper platen will rise automatically (timer is preset at factory for six (6) seconds, but this is easily changed by following the upcoming instructions.)
5. Remove the crust, place on disc, screen, pan or peel, add toppings and bake.

ADDITIONAL NOTES:

Temperature

Note Fahrenheit/Centigrade (Celsius) Conversion

*The temperature controller can be programmed to display either °F or °C. To change: Press the **MODE** button until the temperature is displayed, then push and hold the **SET** button for 10 seconds.*

Timer

- The controller has a count down timer that automatically activates a buzzer at the completion of the application.
- Timer display is minutes: seconds. Range is 00:00 to 10:00; Colons (:) flash while timer is running.

Note

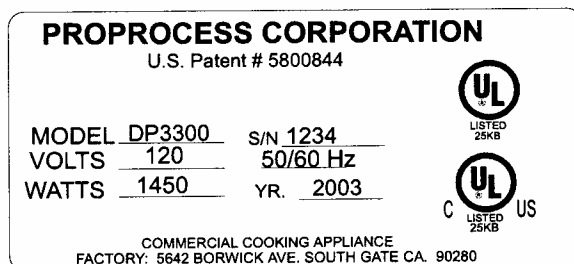

The timer or buzzer may be stopped while the handle is in the down position by pressing both the DOWN (▼) arrow button and the UP (▲) arrow button simultaneously. The timer will automatically reset after the handle is raised.

Counter

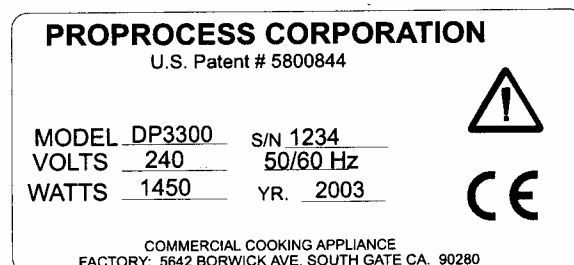

The controller has a built in cycle counter.

- Press MODE button until the counter is displayed.
- Counter display range is 0000 to 9999.
- To reset the cycle counter, display the counter reading, then push and hold both UP (▲) and DOWN (▼) arrow buttons for 3 seconds until the counter resets to zero (0000) on the display.

Preventative Maintenance Suggestions

The Doughpro DP3300 machines are relatively maintenance free. For a long and trouble-free life, the following preventative maintenance should be followed:

Daily Care:

1. ***Teflon coated platens:*** These platens should *only* be cleaned with mild soap and warm water then wiped off with a clean, soft cloth or soft sponge. **Never use steel wool or harsh abrasives or you will cause costly damage.**

Note that the top plate of the lower platen is removable without tools, for cleaning purposes. To remove, simply rotate the platen to the full open position and remove the top plate.

2. ***All other exterior surfaces:***

Here again a daily wipe down with mild soap and warm water will do the job quite nicely.

Never use steel wool or harsh abrasives or you will cause costly damage.

Monthly Care:

Piston maintenance: The piston is the one moving part that requires a grease injection every two (2) to three (3) months. A grease port located on the right side of the upper platen piston is provided for this purpose. Using a standard grease gun fitted with an extension, squeeze a food approved, high temperature grease into the grease port.

Service Problems:

Contact our factory or approved service agency (U.S. only). *Note: When contacting factory for information, parts or service instructions, it is of the **utmost importance** that the serial number of the machine be provided. This number can be found on the serial plate located on the rear of the machine.*

WIRING DIAGRAM 3300 DIGITAL CONT

STEARNS PRODUCT DEVELOPMENT CORPORATION
20281 Harvill Ave, Perris, CA 92570 Tel: (800) 624-6717 - Fax: (951) 657-4594

Warranty & Return Policy

STEARNS PRODUCT DEVELOPMENT CORPORATION warrants all products manufactured by it against defects in workmanship or materials from the date of purchase for a period of (1) year on parts and labor. **This warranty applies to only equipment purchased and used in the United States.**

Exclusions:

- 1. WOOD / GAS FIRED OVENS:** STEARNS PRODUCT DEVELOPMENT CORPORATION warranty applies to the main body of the oven being steel / refractory and insulation shall be free from defects in materials and workmanship for a period of four (4) years from the date of purchase. The gas equipment shall be free from defects in materials and workmanship for a period of one (1) year from the date of purchase. This warranty excludes the tandoori and home oven.
- 2. TANDOORI & HOME OVENS:** STEARNS PRODUCT DEVELOPMENT CORPORATION warrants the Tandoori & Home Oven including gas equipment shall be free from defects in materials and workmanship for a period of one (1) year from the date of purchase.
- 3. Air compressors are excluded from this warranty,** but STEARNS PRODUCT DEVELOPMENT CORPORATION may act as a warranty expeditor in certain instances regarding these compressors. The air compressor manufacturer provides a limited warranty and a copy of this warranty is furnished with all compressors sold by STEARNS PRODUCT DEVELOPMENT CORPORATION. For prompt handling of compressor warranty claims the instructions of the compressor manufacturer must be adhered to.
- 4. Equipment built to special order as well as accessories** are not returnable unless defective within the terms of this warranty.
- 5. In no event shall STEARNS PRODUCT DEVELOPMENT CORPORATION be liable for consequential damages arising out of the failure of any of its products if operated improperly or caused by normal wear or damage by operator abuse.**

Returned Merchandise Policy:

Should it become necessary to return any of the company's products, the following instructions must be adhered to: First, contact our customer service department for approval and a return authorization number. *Please have the serial number of your item available at that time.* All merchandise must be shipped *freight prepaid* by customer or service agency. Subject to the inspection of the product by the company, a restocking charge of 20% of the Net purchased price paid to STEARNS PRODUCT DEVELOPMENT CORPORATION will be assessed. Merchandise may not be returned for credit without *prior written approval* of STEARNS PRODUCT DEVELOPMENT CORPORATION. Collect shipments *will not* be accepted. No returns after 60 days of original shipment date on machines. Purchased parts may not be returned after 30 days. If upon inspection by STEARNS PRODUCT DEVELOPMENT CORPORATION or its authorized agent it is determined the equipment has not been used in an appropriate manner, has been modified, or has not been properly maintained, or has been subject to misuse, misapplication, neglect, abuse, accident, unauthorized modification, damage during transit, delivery, fire, flood, act or war, riot or act of God, then this warranty shall be deemed null and void.

Terms & Conditions:

- Prices indicated in the PRICE LIST are suggested retail prices and are shown in U.S. DOLLARS.
- Terms of Payment: 2% 10 days, NET 30 days.
- NEW ACCOUNTS:** Satisfactory credit information must be provided before open account status can be extended. Unless agreed otherwise, all shipments will be made C.O.D., CASH IN ADVANCE.
- PRICING:** Prices, specifications, model numbers, capacities and accessories are subject to change without notice.
- FREIGHT / ROUTING:** Method of shipment will be determined by STEARNS PRODUCT DEVELOPMENT CORPORATION unless otherwise advised by PURCHASER.
- DAMAGED CLAIMS:** All merchandise shipped at purchaser's risk. Inspection must be made by purchaser at time goods are received. If goods are damaged, the PURCHASER shall request that the agent of the transportation company make a written notation on the proper shipping documents immediately and then file a claim for damage. **GOODS DAMAGED IN SHIPMENT ARE NOT RETURNABLE.**
- RETURNS:** Machines may not be returned after 60 days. Purchased parts may not be returned after 30 days. A restocking fee of 20% will be assessed on non-warranty returns.
- TAXES:** Prices indicated herein DO NOT include State, Federal, Local or foreign taxes or duties, nor do they include fees, permits, insurance or other levies, all of which are the responsibility of the purchaser.
- All orders are subject to acceptance by STEARNS PRODUCT DEVELOPMENT CORPORATION.
- Possession of this price list shall not be considered an offer to sell.
