# Hot express case

## Space \$aver

MODEL **HEC-123**  
**HEC-124**

Space Saver hot express case, model HEC-123.

### General Information

Henny Penny hot express cases are designed to hold and display hot packaged fresh-food items in high-traffic areas for self-serve, impulse sales. The HEC Space \$aver models feature upright, 2-shelf self-serve design with a total height under five feet tall.

Lower height means a lower-priced unit but with the same great features as the taller HEC-103/4 models. The unit's upright orientation and deep shelf design offers high capacity from minimal floor space. HEC models functions as aisle end-caps or wall units, providing grab-n-go service from anywhere in store.

High visibility and convenient service access lets operators show off a wide range of popular hot food items while keeping product fresh and appetizing longer.

Individually heated shelves help keep product at ideal temperatures for a fresher, more appetizing hot food display.

The dramatic curved look draws attention to case while providing maximum product visibility and bright, even lighting throughout cabinet. A carefully designed opaque section of the side glass finishes off the design and blocks shelf attachments from view.

The HEC models are also designed for improved ergonomics, with angled shelves and a higher bottom deck permit easier access. Bumper strip and front mounted, hidden-panel controls are standard.

The HEC comes in three-foot and four-foot lengths. Units are built from high quality materials for long-lasting attractiveness and operation.

### Standard Features

- Compact, upright design saves space and offers merchandising opportunities throughout the store.
- High-efficiency heating elements built into each shelf warm containers from below to help maintain ideal product temperatures.
- Two-shelf design, integrated base produce excellent product visibility and ergonomics.
- Temperature for each shelf can be controlled independently.
- Sleek stainless steel cabinet with stylish tempered glass sidewalls.
- Deep 20 in. (508 mm) shelves hold more product, require less restocking.
- Clear side glass and angled shelves provide optimal product visibility.
- Shatter-resistant fluorescent lights on each level and mirrored stainless steel back wall for bright, uniform lighting.
- Bottom deck set higher for better ergonomics.
- Bumper strip.
- Optional shelf label holders.
- All interior and exterior surfaces are scratch resistant, sanitary and easy to clean.
- Temperature control hidden behind pull-away front panel.
- Front service access.

### Configuration

Please select:

- ☐ Brushed stainless product stop without label holders OR
- ☐ Black product stop with label holders for 1 ¼ in. (31 mm) height
- ☐ 3-in. casters, two locking OR
- ☐ 6-in leveling legs OR
- ☐ No casters, no leveling legs—power cord cannot exit bottom.
