## **HENNY PENNY HEATED HOLDING CABINETS**

### **CF-941 Single Drawer**

The ability to keep foods hot and tasty for long periods of time before serving is critical to the success and efficiency of your Chick-fil-A operation. And the right holding cabinets can make a big difference between what you sell and what you throw away.

Henny Penny counter-top holding cabinets offer foodservice operators and employees the advantages of convenience, space savings, and energy efficiency. Build a system with single-drawer, self-contained units, or get multiple units to create separate holding environments.

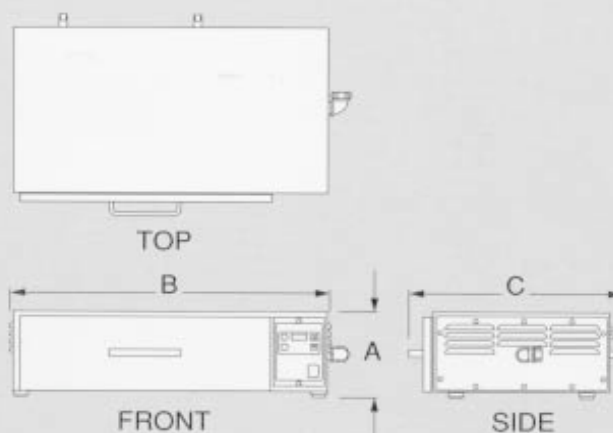

The CF-941 is fully insulated and engineered to achieve optimal heat and humidity levels for virtually any freshly cooked food.

Henny Penny Heated Holding Cabinets are constructed of top quality stainless steel for years of dependable operation and backed by 40 years of foodservice equipment manufacturing experience.
