LIMITED WARRANTY

This product is warranted to be free from defects in material and/or workmanship for a period of 1 year from date of original installation, not to exceed 18 months from the date of manufacture.

Any component which proves to be faulty in material and/or workmanship will be replaced or repaired (at the option of Prince Castle, Inc.) without cost to the customer for parts and labor. This warranty covers on-location service (i.e. trip charges and/or mileage). Travel mileage is limited to 100 miles (200 Kilometers) round trip (one trip warranty) from an authorized service agency or its sub-service agency.

This warranty is subject to the following exceptions/conditions:

- Use of any non-genuine Prince Castle parts voids this warranty.
- All labor to be performed during regular work hours. Overtime premium (the incremental amount) will be charged to the customer.
- Damage caused by carelessness, neglect and/or abuse (e.g., dropping, tampering or altering parts, equipment damaged in shipment, by fire, flood or an act of God) is not covered under this warranty.
- All problems due to operation at voltages other than that specified on equipment nameplates are not covered by this warranty. Conversion to correct voltage is the customer's responsibility.
- This equipment must be serviced by Prince Castle Authorized Service Agency or a Prince Castle Service Technician during the warranty period.

Components

Installation

Remove the unit from the carton and inspect for signs of damage. If there is damage to the unit:

- notify the carrier within 24 hours of delivery
- save carton and packaging materials for inspection purposes
- contact your local dealer, or if purchased directly, the Prince Castle Sales Department at 800-722-7853 or 1-630-462-8800 to arrange for a replacement unit.

Verify that all parts have been received (see *Components*, page 2).

Plug the power cord into the proper electrical receptacle. All electrical connections must be in accordance with local electrical codes and any other applicable codes.

Important

Prince Castle reserves the right to change specifications and product design without notice. Such revisions do not entitle the buyer to corresponding changes, improvements, additions or replacements for previously purchased equipment.

Operation

- 1 Press the On/Off Button to turn the unit on.

The conveyor will begin to turn and the display will read "LD".

When the unit is at operating temperature the display will read "RDY" and the ACT (actual temperature) LED will be lit.

Temperature LED's
Display
Power On/Off Button

- 3 Feed the buns into the bun chute, flat (toasted) side up.

Bun Chute

- 2 Turn the Bun Thickness Adjustment Knobs to the desired setting.

Left Side Control
1 = Thinnest Cut
6 = Thickest Cut

Right Side Control
A = Thinnest Cut
F = Thickest Cut

- 4 Press the On/Off Button to turn the unit off.

If the heater is above 450°F, the display will alternately show "COOL" and "OFF", and the conveyor belt will continue to run approximately 45 minutes. When the unit has cooled sufficiently, the display will go blank and the conveyor motor will turn off.

Power On/Off Button

NOTE: Factory preset temperature is 570°F and should provide satisfactory results in most applications. Maximum temperature of unit is 580°F (304°C).

Daily Cleaning

⚠ WARNING

Before performing any maintenance, press the power switch to the OFF position. If the heater is above 450°F (232°C), the display will alternately show "COOL" and "OFF", and the conveyor belt will continue to run approximately 45 minutes. When the unit has cooled sufficiently, the display will go blank and the conveyor motor will turn off.

Unplug the power cord from the electrical receptacle.

⚠ CAUTION

This unit is not watertight. Do not clean with a water jet or jet spray. Do not immerse the unit in water.

1. Turn the unit off and unplug the power cord from the electrical receptacle.
2. Wipe all stainless parts and unit with a damp cloth. **DO NOT** use a green scotch bright pad cleaner, ice or water.

3

Remove the lower retaining bar from the release sheet and pull the release sheet up thru the top of the unit. Remove the upper retaining bar from the release sheet.

Lower Retaining Bar

Remove release sheet

1

Press the On/Off Button to turn the unit off.

If the heater is above 450°F, the display will alternately show "COOL" and "OFF", and the conveyor belt will continue to run approximately 45 minutes. When the unit has cooled sufficiently, the display will go blank and the conveyor motor will turn off.

Unplug the power cord from the electrical outlet.

Power On/Off Button

4

Loosen the thumbscrews and remove the side panel.

Thumbscrews

2

Remove the front cover by pulling up and off the unit. Set the cover aside.

Front Cover

5

To release tension on the conveyor belt, press in and down on the roller.

- 6** Release the upper and lower locking latches from the conveyor rollers.

- 7** Remove the conveyor belt. Rotate the belt while removing it from the side of the unit.

- 8** Remove the plastic spline from the belt.

- 9** Place the belt and Teflon sheet on a flat surface. Clean belt and sheet with Sizzle Plus multi-purpose cleaner acceptable for use on food contact surfaces.

The conveyor belt has only one contact surface and must be re-installed with orange side facing out.

The Teflon sheet uses both sides as the contact surface. When re-installing, rotate the usage by turning top-to-bottom and/or turning the sheet inside/out.

- 10** Reassemble the unit by reversing steps 1 - 8.

When reassembling conveyor or belt, make sure plastic spline is positioned correctly as shown.

When reassembling release sheet, be sure to install upper and lower retaining bars in the correct end.

3

To view the setpoint temperature, press and release the SET Button. The setpoint LED will glow and the setpoint will be displayed for 5 seconds, then change back to RDY.

To switch from Fahrenheit to Celsius, turn the unit off. Press and hold the DOWN Arrow Button and turn the unit back on. When you release the Arrow Button, the display will be in Celsius.

Temperature displayed in Celsius

To switch from Celsius to Fahrenheit, turn the unit off. Press and hold the UP Arrow Button when turn the unit back on. When you release the Arrow Button, the display will be in Fahrenheit.

4

To change the setpoint temperature, press and hold the SET Button for 6 seconds. The setpoint and program LED's will glow and the setpoint will be displayed.

1

Press the On/Off button. Conveyor will begin to turn and the display will read LO.

When the unit reaches its setpoint temperature, the display will read RDY.

2

To view the actual temperature, press and release the UP or DOWN Arrow Button. The display will show the actual platen temperature for 5 seconds, then change back to RDY.

5

Use the UP or DOWN Arrow Buttons to adjust to the desired setpoint.

Press and release the SET Button to save the new setpoint and return to the operation mode.

Troubleshooting

Problem	Possible Cause	Corrective Action
Unit will not heat up.	No power to unit. Inoperable power cord. Loose connection on power switch. Inoperable power switch. High limit switch tripped.	Make sure power cord plugged into the unit and proper electrical receptacle. Replace power cord. Tighten power switch connections. Replace power switch. Reset limit switch. Using a pencil or pen, press the hollow portion of the 3/8" long brown, plastic stem located at the right-hand rear of the unit. Allow the unit to cool (approximately 15 minutes) before starting.
Unit heats up but conveyor will not run.	Loose motor connection. Inoperable motor. Stripped drive gear. High limit switch tripped.	Tighten motor connection. Replace motor. Replace drive gear. Reset limit switch. Using a pencil or pen, press the hollow portion of the 3/8" long brown, plastic stem located at the right-hand rear of the unit. Allow the unit to cool (approximately 15 minutes) before starting.
Buns under or over done.	Check bun crush setting. Verify setpoint temperature. Dirty teflon sheet.	Adjust for proper compression. Adjust setpoint for proper temperature. Clean or replace teflon sheet.

When the platen temperature drops 24° or more below the setpoint temperature, the display will switch from **RDY** to **LO**. If the display remains at **LO** for 30 minutes, contact an authorized Prince Castle Service Agent.

To extend the life of the motor, add 2-3 drops of high-temperature oil on a monthly basis. This task can be performed by an authorized technician.
